
Rakesh Kumar Chaudhary

Suryabinayak,Bhaktapur
9825775163 | rakeysh36@gmail.com

OBJECTIVE

Motivated and detail-oriented Computer Engineering graduate seeking an entry-level position in a reputable organization where I can apply my technical skills, contribute to innovative projects, and grow professionally.

EDUCATION

- | | |
|------|--|
| 2023 | <ul style="list-style-type: none">• Khwopa Engineering College
Bachelor in computer engineering |
| 2018 | <ul style="list-style-type: none">• Greenland International college
High School Certificate |

SKILLS

- C, C++, HTML/CSS, JavaScript,PHP,Python
- Databases: MySQL
- Machine learning
- Problem-solving, debugging, and software testing.
- Communication skill

PROJECTS

- **Online Banking System**
Developed an online banking system using C++ to manage user accounts, transactions, and balances efficiently.
Tools/Technologies Used: C++, File Handling, Object-Oriented Programming.
Key Achievement: Delivered a user-friendly interface and improved transaction processing efficiency.
- **Online Glasses store**
Designed and developed an e-commerce website for selling glasses using WordPress.
Tools/Technologies Used: WordPress, WooCommerce.
Key Achievement: Delivered a responsive and visually appealing website with seamless shopping experience.
- **Online Movie Booking System**
Developed a web application for booking movie tickets using HTML, CSS, JavaScript, and SQL.
Tools/Technologies Used: HTML, CSS, JavaScript, PHP,mysql.
Key Achievement: Successfully implemented real-time seat availability and a secure booking process.
- **Explore Nepal**
Developed a platform that allows users to explore and choose travel destinations based on customizable packages.
Tools/Technologies Used: HTML, CSS, JavaScript, PHP, SQL.
Key Achievement: Enhanced user experience with an intuitive design and efficient package selection process.
- **Fitness At Home Using Human Pose Estimation**
Designed an AI-powered system for at-home fitness using human pose estimation to analyze user movements.
Tools/Technologies Used: Python, OpenCV, TensorFlow/Keras, and Mediapipe.
Key Achievement: Improved exercise effectiveness and safety for users with real-time monitoring and corrections.
- **Leaf Disease Detection System**
Developed an AI-based system to detect and diagnose lead-related diseases using machine learning algorithms.
Tools/Technologies Used: Python, Machine Learning, Pandas, NumPy, and TensorFlow/Keras.
Key Achievement: Achieved high accuracy in disease prediction and streamlined the diagnostic process.
